QUALIFICATION

- **B.E in Computer Science Engineering** 2016
Srinivas School of Engineering, Mukka.

PROJECTS

Projects in GitHub and Render:

- **Home Essentials E-commerce Website:** Built using MERN stack. It allows users to browse, purchase, and manage home products online. Implemented secure authentication, product management, shopping cart, and order processing using modern web technologies.
- **Job Application Tracker:** Built using MERN stack. It focuses on managing and tracking job applications through a simple web based platform.
- **Portfolio:** Developed my portfolio using React, Vite and Tailwind CSS.

- **Online-Payment Website:** Built using MERN stack. It allows users to login, upload product, delete, add to cart, buy online.
- **OTP-Verification:** Built using MERN stack. It allows user to register, login, forget password, otp verification and then directs to home page.
- **Notes App:** Built using MERN stack. It mainly consists of CRUD operations. Add, delete, edit and creating the notes.
- **Static Website:** Built using HTML, CSS, and JavaScript, featuring multiple jewellery collections, category-wise shop pages, that directs to add-to-cart and buy-now pages, and a JavaScript-based countdown timer.
- **Bootstrap-Website:** Developed with bootstrap, HTML, CSS, JavaScript, JQuery. Website is about providing exceptional moving services to the customers.
- **Dice Game:** Developed using HTML, CSS, JS. There are two players in which one of the player wins if the rolled dice number is greater than the other. It's a draw if same rolled numbers display.
- **Animals Sound Kit:** Developed using HTML, CSS, JS. The sound of particular animal is played when clicked the image button or keyboard buttons of the alphabet displayed.
- **Simon Game:** Developed using HTML, CSS, JS. The sound and background effects are implemented. The player should remember the sequence order. If followed wrong order, game over.
